

ABOUT US

McBriar Farm is a private, highly sought after upscale boutique equine boarding and training facility situated on 15 picturesque acres.

Our facility features a world class 90' by 190' arena with CLOPF® Fiber Footing, 4 board fencing and state of the art irrigation system. It is optimized for footing consistency and safety to reduce training and riding strain for horses of all varieties and ages.

The 65' diameter round pen includes grass and M10 footing and is conveniently located close to the main barn, riding arena and bridle path. Our barn boasts spacious and clean stalls with private run outs (steel versus wood boards) with M10 and mud management control to allow horses additional room to move safely and comfortably.

We maintain lush grass pastures each summer as long as possible due to vigilant management and rotation protocols. In addition to our arena, round pen, and 4 board pastures we have a dry lot, run-in shelters, a cool down walking area and available farrier services, all providing for the needs and desires of the most discriminating of horse owners.

McBriar Farm was conceived and developed under the guidance of MariRose James whose life passion became horses after just one ride. It was love at first ride and this discriminating facility reflects her love, passion, and pursuit to continually develop and maintain truly healthy and happy horses.
